

April 18, 2007

Marlene H. Dortch, Secretary  
Federal Communications Commission  
Office of the Secretary  
445 12th Street, SW  
Washington, DC 20554

Re: WT Docket 96-86

Dear Ms. Dortch:

Pursuant to Section 1.1206(b)(2) of the Commission's Rules, this is to notify you that on April 17, 2007, Michael Senkowski of Wiley, Rein and the undersigned met with Barry Ohlson, Legal Advisor to Commissioner Adelstein regarding the above captioned proceeding.

During the meetings we discussed Motorola's previously filed position regarding the advantages of wideband technologies for meeting public safety's need for a cost effective data solution and the importance of allowing flexibility to deploy such technology. Motorola is dedicated to providing interoperable equipment solutions that meet the data needs of public safety using the most appropriate broadband and/or wideband technologies and supports consolidation of the public safety narrowband spectrum to facilitate the efficient deployment of broadband technologies. Decisions on which technology or combination of technologies require meaningful input from the local user community. Accordingly, Motorola strongly supports the position of the Association of Public-Safety Communications Officials (APCO), International Association of Chiefs of Police (IACP), National Sheriffs Association (NSA), Major Cities Chiefs Association (MCCA), and Major County Sheriffs Association (MCSA) that the Commission should not adopt a ruling that would preclude future wideband data operations in the 700 MHz band.

Pursuant to the Commission's Rules, one copy of this notice is being filed electronically with the Commission. If you require any additional information please contact the undersigned at (202) 371-6953.

Sincerely,

/s/ Steve B. Sharkey

Steve B. Sharkey, Director  
Director, Spectrum and Standards Strategy
